KEY TRAINING POLICY MEASURE

Skills to Advance is a national initiative that provides upskilling and reskilling opportunities to employees in jobs undergoing change and to those currently employed in vulnerable sectors. It equips employees with the skills they need to progress in their current role or to adapt to the changing job market. Working wth employers - especially SMEs - skills needs are identified in the workforce and subsidised education and training to staff is provided. The scheme is potentially open to all but especially those: currently working in a lower-skilled job; aged 50 or over; or currently working in a job that is experiencing significant change.
