Methods

Methods

SKILLS FORECASTING

PES prepares annual forecast of employment opportunities for 155 professions. The forecast is based on analysis of economic and demographic indicators to help understand general developments in the labour market.

EMPLOYER SURVEYS

For representativeness of the results, the respondents were selected proportionately to the distribution of the employed population by economic activities.

EXPERT PANELS

Labour market experts are taking part in preparation of the forecast.

Use of skills intelligence

INFORMING AND TRAINING CAREER GUIDANCE AND COUNSELLORS

System can be used as a tool for assessing future needs of employees, so the training programs can be changed accordingly.

INFORMING CAREER-MAKING DECISIONS OF STUDENTS

System can be used as a guidance tool for students while making their career choices

INFORMING JOB-SEARCH DECISIONS OF UNEMPLOYED

System can be used as a guidance tool for unemployed while deciding on reskilling

Stakeholders

Main responsible body

NATIONAL PES

LIETUVOS DARBO BIRŽOS

Other involved organisations

NATIONAL MINISTRY

The Ministry of Economy provides data for forecast

REGIONAL AGENCY

The survey of employers is conducted by the regional employment services (part of the Lithuanian PES)

OTHER

While not directly involved in forecasting, the consultations with training providers, employer federations, trade unions, chambers of commerce and industry and social partners take place.

Beneficiaries

YOUNG PEOPLE MAKING THE TRANSITION FROM EDUCATION INTO WORK

Tool is used by young people while making their future career decisions

YOUNG PEOPLE WITH LOW LEVELS OF BASIC SKILLS /EARLY LEAVERS FROM EDUCATION OR TRAINING

The tool can be used by young people who would like to change their educational path.

ADULTS IN EMPLOYMENT WITH RESKILLING POTENTIAL

General adults can use the tool in order to identify specific demand in labour market and make decision on reskilling.

OTHER

In broader sense the tool benefits all the population - pupils, students, unemployed, employees, training providers. Beneficiaries can evaluate and forecast their career possibilities, while training providers are able to adapt to the market demand and prepare specific education and training programmes.

Sustainability

Success factors Long experience and adopted practise from Scandinavian institutions of employment. effectiveness. It is the only instrument across all country instruments that provides information about employment possibilities. The instrument is online and available for all beneficiaries.

Barriers None at the moment

Monitoring and evaluation While the progress of the instrument is not directly measured, it is widely used by variety of beneficiaries and new functionality is added on a regular basis.

Updates

YES

The forecast data is updated regularly each year.

Effectiveness The purpose of the instrument is to provide information, so it is a source of knowledge for decision makers. The instrument is being prepared for a long period, so it is also useful for monitoring longer periods and longitude studies. Barometers, which are intended for the public, are publicly available on the website of the Lithuanian Labour Exchange.

Sustainability Yes, because the instrument is useful for the labour market.
