

Further Education and Training Colleges of the Future (CotF): Capital Call

POLICY DEVELOPMENT**STRATEGY/ACTION PLAN** **IRELAND**

Timeline

2022 Implementation**2023 Implementation****2024 Implementation****ID number 45179**

Background

Further education and training (FET) capital stock (buildings, equipment) was of variable quality across the system, consisting mainly of small scale dispersed facilities, and required significant modernisation. The National FET strategy 2020-24 set it as a critical priority. One of the ways to modernise FET is through creating the FET Colleges of the Future (CotFs). The Department of Further and Higher Education, Research, Innovation and Science (DFHERIS) announced capital investment of EUR 430 million in FET and higher education (HE), with 45% directed to FET, including the establishment of FET CotFs.

Two funds have been set up:

- (a) the FET College of the Future (CotF) Major Projects Fund, to support projects that can help drive reform of the FET sector, including consolidation of provision in high quality facilities, integration of further education and training, realisation of centres of excellence, and unified tertiary planning;
- (b) the FET Strategic Infrastructure Upgrade Fund (SIUF), to support smaller-scale investments in existing FET infrastructure, ensuring that works progressed within the context of an overall strategic plan for the building and aligned with FET College of the Future principles.

The statutory VET sector was surveyed in 2021 on capital stock, for the first time ever. That provides a baseline on the physical delivery infrastructure of FET nationwide as regards site details, programme delivery in each location, space suitability and buildings condition, and informs future capital investment decisions in FET.

Capital investment in FET is coordinated by a single unit in the DFHERIS to ensure a collaborative regional tertiary education investment strategy.

Objectives

Creating CotFs, supported with capital investment, is aimed at putting in place a FET system that provides cutting edge, quality and accessible education and training to potential learners, staff, employers and communities. CotFs should improve the perception of FET and lifelong learning in the Irish society by being centres of community-based learning excellence.

Description

The National FET Strategy defined that CotFs should have the following characteristics:

- (a) consolidation: CotFs are single integrated colleges;
- (b) dual outcome focus: the offer of courses designed to facilitate immediate entry to careers and employment and those that link directly to further study in HE, exploring opportunities for co-delivery with HE institutions;
- (c) access pathways: supporting a learning pathway from a network of FET providers offering Level 1 to 4 provision;
- (d) consistent learner support: providing a central resource for learner support services, ensuring all learners are supported in a consistent manner;
- (e) flexible learning opportunities: all year-round availability and the offer of flexible and technology enabled opportunities available to a diverse array of potential learners, including those in employment;
- (f) Green Campus: embedding sustainable development principles across its operations and ensuring its students are equipped with the environmental awareness and green skills which can drive future change;
- (g) institutional structure: staffing, governance and management structures appropriate to an education and training institution of scale;
- (h) community resource: to serve as a community resource, with facilities used for a range of societal and cultural purposes and be seen as the obvious 'go to' place to access education and training;
- (i) financial autonomy: more financial autonomy for the ETB with greater scope to generate its own revenue, build reserves across calendar years and invest strategically to support future growth and development.

2022 Implementation

In February 2022, the DFHERIS announced the first ever FET capital call for proposals, both for SIUF and CotFs.

By autumn of 2022, 13 projects passed the first requirement assessment for the SIUF capital call. While individual project cost estimates are to be refined as part of the design stage, it was expected that investments under this phase could reach a total of EUR 50 million. Other 14 project applications remained under consideration.

A total of 10 new major CotF projects in key locations across the country passed the first assessment stage.

2023 Implementation

A further six (6) SIUF projects were announced by the Minister of Further and Higher Education, Research Innovation and Science, bringing the total number of SIUF projects to nineteen (19).

2024 Implementation

In October 2024, the Minister announced six (6) College of the Future projects has been approved to progress to e Pre-Tender - Project Design, Planning, and Procurement Strategy stage of development under Infrastructure Guidelines - Ireland's set of financial rules and procedures governing capital investment. The Infrastructure Guidelines aim to ensure that Irish public bodies adhere to their obligations, to treat public funds with care and ensure the best value for money is obtained when public money is invested in public capital infrastructure. the projects were in a variety of locations across Ireland - Cavan, Cork, Kildare, Kilkenny, Limerick and Tipperary. This capital investment will deliver state of the art facilities to drive access to education, lifelong learning and workforce transformation in those regions.

Bodies responsible

- Further Education and Training Authority (SOLAS)
- Department of Further and Higher Education, Research, Innovation and Science (DFHERIS)
- Education and Training Boards Ireland (ETBI)
- Cavan Monaghan Education and Training Board (CMETB)
- Cork Education and Training Board (CETB)
- City of Dublin Education and Training Board (CDETb)
- Donegal Education and Training Board (DETB)
- Dublin Dun Laoghaire Education and Training Board (DDLETB)
- Galway Roscommon Education and Training Board (GRETb)
- Kildare Wicklow Education and Training Board (KWETB)
- Kilkenny Carlow Education and Training Board (KCETB)
- Louth Meath Education and Training Board (LMETB)
- Longford Westmeath Education and Training Board (LWETB)
- Limerick Clare Education and Training Board (LCETB)
- Mayo Sligo and Leitrim Education and Training Board (MSLETB)
- Kerry Education and Training Board (KETB)
- Laois Offaly Education and Training Board (LOETB)
- Tipperary Education and Training Board (TETB)
- Waterford Wexford Education and Training Board (WWETB)

Target group

Learners

Learners in upper secondary, including apprentices

Young people (15-29 years old)

Young people not in employment, education or training (NEETs)

Learners with migrant background, including refugees

Learners at risk of early leaving or/and early leavers

Learners with disabilities

Adult learners

Older workers and employees (55 - 64 years old)

Unemployed and jobseekers

Persons in employment, including those at risk of unemployment

Low-skilled/qualified persons

Learners from other groups at risk of exclusion (minorities, people with fewer opportunities due to geographical location or social-economic disadvantaged position)

Education professionals

Teachers

Trainers

School leaders

Adult educators

Guidance practitioners

Entities providing VET

VET providers (all kinds)

Other stakeholders

Social partners (employer organisations and trade unions)

National, regional and local authorities

Thematic categories

Modernising VET infrastructure

Modernising infrastructure for vocational training

Modernising VET offer and delivery

Supporting Centres of vocational excellence (CoVEs)

Subsystem

IVET CVET
