

Transforming Learning 2020-24: Ireland's National Further Education and Training Strategy

POLICY DEVELOPMENT

REGULATION/LEGISLATION

 IRELAND

Timeline

2020 Legislative process

2021 Approved/Agreed

ID number 35767

Background

Every five years, under the Further education and training Act 2013, SOLAS (Further Education and Training Authority) must propose a strategy for the development of further education and training (FET) in Ireland to the education minister. The strategy must reflect government policy in relevant areas, the evolving environment and the future world of education and work. The FET strategy (most VET training occurs within FET) steers the system to respond to this context over the following five years.

A new and reformed FET system was established in 2013 and the concept of an integrated model of FET was introduced. Over the past six years the FET sector has been in a development and establishment phase, which involved the embedding of systems and processes to support planning, funding and gathering of learner data. This was reflected in Ireland's first further education and training strategy (FET) 2014-19; the strategy was all-encompassing and focused on clarifying roles and responsibilities across multiple stakeholders. The development path that followed established an integrated and devolved FET system, which over the last six years has delivered significant achievements.

Objectives

The FET strategy 2020-24, by simplifying the FET structure, aims to improve access to it; support its learners consistently; and build its provision around a distinct, diverse and vibrant community-based FET college of the future.

Description

The FET strategy 2020-24 was developed in consultation with the FET sector and other key stakeholders. Consultation was wide-ranging and included bilateral meetings, regional workshops and a public call for submissions. Strategy development also involved developing an understanding of the policy context, the evolving environment and the nature of FET provision in Ireland, and then benchmarking this against other international approaches to further and vocational education and training.

A strategy has been developed which sets out a vision for FET's development over the next

five years, based around three key priorities: skills, pathways and inclusion. The framework for success of FET in the next five years will be based on these strategic priorities. However, it is recognised that to deliver real reform, integration and performance improvement, there must also be a parallel focus on key enabling themes. Enabling themes are other areas that need to be addressed to realise the vision of future FET. The strategy sets out four enabling themes: staffing; capabilities and structures; learner and performance-centred; digital transformation of FET and capital infrastructure.

A focused approach to implementation of these strategic priorities and enabling themes will be key in bringing the strategy to fruition.

A strategy with a vision of improving lives for citizens, while also shaping the future world of work and the skills needed to fuel it, is more relevant than ever, particularly as Ireland rebuilds and recovers from the social and economic shocks as a result of COVID-19.

2020 Legislative process

The further education and training (FET) strategy has been drafted and awaits final approval pending the formation of a government in Ireland.

2021 Approved/Agreed

The further education and training (FET) strategy was formally launched by the Department of Further and Higher Education, Research, Innovation and Science in July 2020.

A dedicated project management office and a steering group, comprised of key stakeholders including the DFHERIS, Quality and Qualifications Ireland, Education and Training Boards (ETBs), Education and Training Boards Ireland (ETBI), were established in 2021 to provide oversight and to ensure progress on actions outlined in the FET strategy implementation plan.

Bodies responsible

- Further Education and Training Authority (SOLAS)
- Department of Education
- Department of Education and Skills (until 2020)
- Department of Further and Higher Education, Research, Innovation and Science (DFHERIS)

Target group

Learners

Learners in upper secondary, including apprentices

Young people (15-29 years old)

Young people not in employment, education or training (NEETs)

Learners with migrant background, including refugees

Learners at risk of early leaving or/and early leavers

Learners with disabilities

Adult learners

Older workers and employees (55 - 64 years old)

Unemployed and jobseekers

Persons in employment, including those at risk of unemployment

Low-skilled/qualified persons

Learners from other groups at risk of exclusion (minorities, people with fewer opportunities due to geographical location or social-economic disadvantaged position)

Education professionals

Teachers

Trainers
School leaders
Adult educators
Guidance practitioners

Entities providing VET

Companies
Small and medium-sized enterprises (SMEs)
VET providers (all kinds)

Other stakeholders

Social partners (employer organisations and trade unions)

Thematic categories

Governance of VET and lifelong learning

Engaging VET stakeholders and strengthening partnerships in VET

Modernising VET offer and delivery

Acquiring key competences

Supporting lifelong learning culture and increasing participation

Providing for individuals' re- and upskilling needs

Subsystem

IVET CVET
