Description

From January 2016 to April 2017, the Ministry of Children and Education carried out a survey to collect information on tools for assessing school performance. The aim of the survey was to identify initiatives that have proved effective. The survey findings form the basis of recommendations to vocational colleges to develop local initiatives to reach the objectives of the 2015 VET reform. In addition, the education ministry has drawn up an inspiration catalogue for VET colleges to help them develop their 2017 action plans in line with the objectives of the 2015 VET reform. This catalogue is based on a large project conducted by two university colleges, which focused on three areas: (a) inspirational tools for quality assurance (b) resources for learning objectives (c) ideas for quality assurance.
