

Mapping tool for skills acquired abroad

POLICY DEVELOPMENT

PRACTICAL MEASURE/INITIATIVE

 SWEDEN

Timeline

2018 Implementation 2019 Implementation 2020 Implementation

2021 Completed

ID number 28534

Background

A tool was needed to support the counselling and mapping skills of counsellors and VET teachers in upper secondary and adult education.

Objectives

Allowing people who have gained their professional experience abroad to recognise their experience so that their educational or professional integration can be facilitated.

Description

The National Agency for Education launched, in March 2018, a skills mapping web-based tool for persons who have experience in professional work, or equivalent experience, from other countries. The tool assists individuals to become aware of their skills, which in turn can shorten their study time and contribute to improved integration through access to the labour market. It provides information of core content and knowledge requirements for courses in the upper secondary education system in several languages. At the time of the launch the tool was available in English, Arabic, Persian and Somali. The Education Act states that adults in municipal adult education can have their prior knowledge and competence validated. The tool is an important instrument for making validation possible at provider level for newly arrived migrants.

2018 Implementation

2019 Implementation

In 2019, two languages, French and Tigrinja, were added to the tool. The core contents of all VET courses of Swedish upper secondary education are available in six languages.

2020 Implementation

Due to changes in the syllabuses of 20 VET courses, the skills mapping tool was

updated in all six languages during 2020.

2021 Completed

In 2021, the tool is operational, available in six languages and runs on a regular basis.

Bodies responsible

- National Agency for Education

Target group

Learners

Learners with migrant background, including refugees
Adult learners

Thematic categories

Transparency and portability of VET skills and qualifications

Learners' possibilities of accumulation, validation and recognition of learning outcomes acquired non-formally and informally

Supporting lifelong learning culture and increasing participation

Lifelong guidance

Subsystem

IVET CVET
