

E-learning tools for entrepreneurship and learning-to-learn competences in VET

POLICY DEVELOPMENT

PRACTICAL MEASURE/INITIATIVE

 LITHUANIA

Timeline

2017 Design 2018 Pilot 2019 Completed

ID number 28341

Background

Two key questions need to be answered when formulating VET policy and seeking to improve the system: how many and what type of professionals need to be trained? Belonging to the EU labour market also carries a requirement for managing the national qualifications system to ensure its transparency and the comparability of qualifications; these factors are important both for the free movement of learners and workers, and for the free movement of capital and attraction of foreign investment.

Objectives

The aim of this policy is to ensure that VET and adult education include modern content in line with the Lithuanian qualifications framework. Tasks in this area include:

- (a) developing and / or updating modular VET programmes and related learning tools;
- (b) introducing interactive e-learning tools in VET and non-formal adult education programmes;
- (c) improving the processes involved and quality with regard to the development of key competences for entrepreneurship and learning to learn.

Description

In 2016, the Qualifications and VET Development Centre (KPMPC) launched a national project entitled 'Development of the Lithuanian qualifications system' (Phase 1) (No 09.4.1-ESFA-V-734-01-0001). In November 2017, the design began with an interactive e-learning tool to aid with learning to learn and entrepreneurship competences. The tool was tested in 18 VET and non-formal adult education programmes in 2018.

2017 Design

2018 Pilot

2019 Completed

The tool was integrated into 180 non-formal adult education programmes in 2019 and implementation of the activity was completed.

Bodies responsible

- Qualifications and VET Development Centre (KPMPC)

Target group

Learners

Learners in upper secondary, including apprentices
Young people (15-29 years old)
Adult learners

Thematic categories

Modernising VET offer and delivery

Acquiring key competences

Subsystem

IVET CVET
