

OECD dashboard: Monitoring child well-being

Comprehensive indicators for understanding and enhancing children's lives

Description

The OECD child well-being dashboard provides data for policymakers and the public to monitor efforts to promote child well-being, featuring 19 key indicators on children's outcomes and additional context indicators on drivers of well-being. The dashboard, built in line with the OECD's child well-being measurement framework, offers a multi-dimensional approach to understanding children's material, physical, cognitive, and socio-emotional outcomes.
