

Luxembourg - Leaving education early: putting vocational education and training centre stage

Description

This report discusses the rates of early leaving from VET, and the type of data collected in the country to monitor this phenomenon. The report summarises the main strategies and policy initiatives to tackle early leaving from education and training, and discusses the role played by VET. The country report was developed as background material to the Cedefop study: [Leaving education early: putting vocational education and training centre stage](#).

Statistics and data

Data on Vocational education and training in Luxembourg

VET in Europe is the most comprehensive information resource on vocational education and training (VET) systems in Europe. ReferNet, Cedefop's European network, provides descriptions of national VET systems in the European Union, Norway and Iceland based on a common template designed by Cedefop.

Publications

Leaving education early: putting vocational education and training centre stage

Volume I: investigating causes and extent

This Cedefop study examines the contribution that vocational education and training (VET) can make to reducing early leaving from education and training (ELET).

Leaving education early: putting vocational education and training centre stage

Volume II: evaluating policy impact

This Cedefop study focuses on the contribution that vocational education and training (VET) can make to reducing early leaving from education and training (ELET).
