

# Prevent early leaving from vocational education and training: guidelines and proposals

*Prevenir el abandono de los estudios en la formación profesional: orientaciones y propuestas*

## Description

---

The aim of this guide available in Spanish is to provide teachers and VET institutions with guidelines and resources to prevent students' early leaving from VET.

The guide is divided into two parts: the first one focuses on analysing problems and causes of early leaving from VET, based on data from the Balearic Islands produced within the framework of the project *tinerarios de éxito y abandono en la formación profesional del sistema educativo (IEAFP)* (Success and dropout itineraries in vocational education and training of the education system); the second part presents aspects of educational interventions with evidence that can prevent successfully this phenomenon.

## Countries
