Workshop 1: Helping adult migrants and ethnic minorities to enter the labour market

The following issues will be addressed in the workshop:

- How are migrants and ethnic minorities supported in your country to use fully their potential in terms of knowledge, skills and competence?
- How do various stakeholders cooperate to support migrants and ethnic minorities participating in learning and accessing the labour market (for example, partnerships at regional and local levels between public services, education and training providers and employers, etc.)?
- What issues related to effective use of migrants and ethnic minorities' skills and competences need to be addressed in the future?
- What have you learned from the workshop's presentations? Which messages do you plan to bring back to your own organisation?
