**Workshop 2:  
Empowering adult low-skilled and older workers to find a job  
and/or stay in employment**

**The following issues will be addressed in the workshop:**

- How are the low-skilled and older workers supported in your country, to use fully their potential?
- How do various stakeholders cooperate to support the low-skilled and older workers participating in learning and accessing the labour market (for example, partnerships at regional and local levels between public services, education and training providers and employers, etc.)?
- What issues related to supporting them in finding a job and keeping them in employment need to be addressed in the future?
- What have you learned from the workshop's presentations and discussions?  
Which messages do you plan to bring back to your own organisation?
