

Enterprise surveys as a tool for identification of skill needs

Alena Zukersteinova

Cedefop/Skillsnet

Rationale

- changing environment in Europe;
- the information deficit about future skill needs in Europe;
- complementary information to occupational skill needs forecasting at European level.
- need for comparative information;

Objectives

- to map existing relevant enterprise surveys in Europe and MS;
- to compare and discuss surveys' objectives and methods;
- to agree about future steps towards feasibility of a common approach to enterprise surveys.

Template

Experts have been invited to submit a short information on national enterprise surveys based on a template prepared by Cedefop's Skillsnet team.

- **Answers from 15 countries (+ Research Int.)**
- **Compilation + summary**
- **13 countries represented at the workshop**

Workshop agenda

- ▶ Overview of existing surveys at international and European level
- ▶ Examples of cross-country surveys
- ▶ Short presentations of Member States' national surveys + short discussion sessions
- ▶ Summary: comparison of country surveys
- ▶ Discussion and identification of possible solutions
- ▶ Agreement on further concrete steps...

Our task...

...to try to find a feasible common European approach to enterprise surveys as a tool for identification of skill needs and skill gaps

If the initiative finds interest and support
→ it may grow into a longer-term project in the future
