Junior Software Developer

As Junior Software Developer, you will develop excellent software for use in field mapping, data collection, sensor networks, street navigation, and more. You will collaborate with other programmers and developers to autonomously design and implement high-quality web-based applications, restful API's, and third party integration.

We're looking for a passionate, committed developer that is able to solve and articulate complex problems with application design, development and user experiences. The position is based in our offices in Harwell, United Kingdom.

You are the right one, if

- you are interested in designing, implementing and integrating specialized applications and you like to work with high-end development tools and infrastructures
- you like using state-of-the-art web technologies to realize customized software solutions while being able to expertly use standard products / SDKs as well as libraries
- You have a solid computer science education (HTL, FH or University) and solid programming skills with Java and Eclipse
- Ideally, you have already gained experience with SOAP, WSDL and Web Services, as well as object-oriented modeling (UML) skills

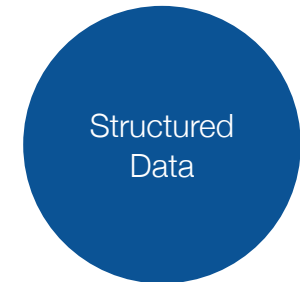

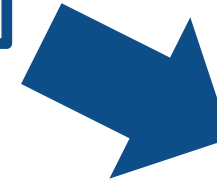

We offer you

- working in a dedicated, highly motivated team in a professional environment
- Consistent training and further education as well as broadening horizons by attending international conferences
- interesting development opportunities for Certified Project Manager, Certified Scrum Master etc.
- numerous benefits, benefits and cool events as well
- above-average payment (at least EUR 35,000 gross annual salary, depending on your experience and qualifications also more) and a performance-based bonus system

Contact Person: Mag. Dipl.-Ing. Christian Distelberger

Overall Data Flow - Recap

CEDEFOP

European Centre
for the Development
of Vocational Training

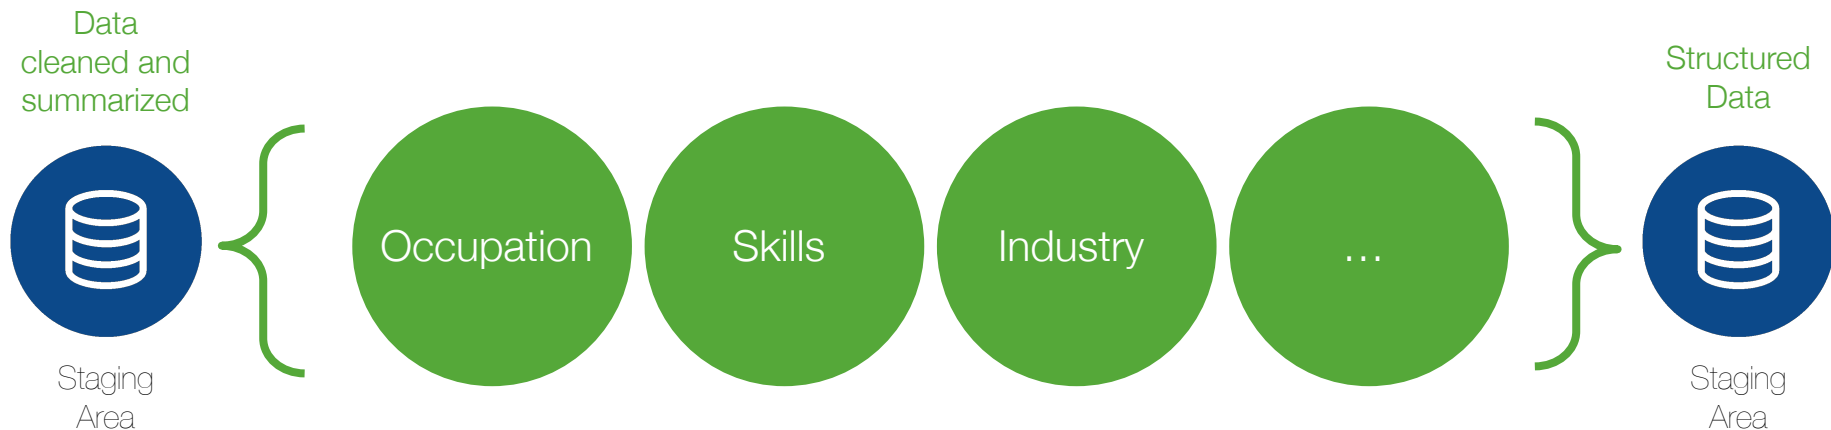

AO/DSL/VKVET-GRUSSO/Real-time LMI 2/009/16

Information Extraction and Classification

Real Time Labour Market Intelligence

Information Extraction is an area of natural language processing that deals with finding **factual information** in free text.

This task uses **machine learning techniques** (ontology based learning, supervised learning and unsupervised learning) to match job ads with **standard classifications**.

Machine Learning → Ontology based learning,
supervised learning and unsupervised learning,
etc.

CEDEFOP

European Centre
for the Development
of Vocational Training

Information Extraction

Information Extraction: analyse an unstructured document with the scope of extracting specific information.

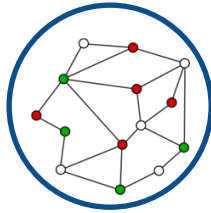

Classification

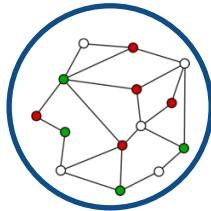

Language
Detector

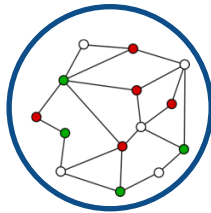

Pre
Processing

IT – Ontology-based
Models

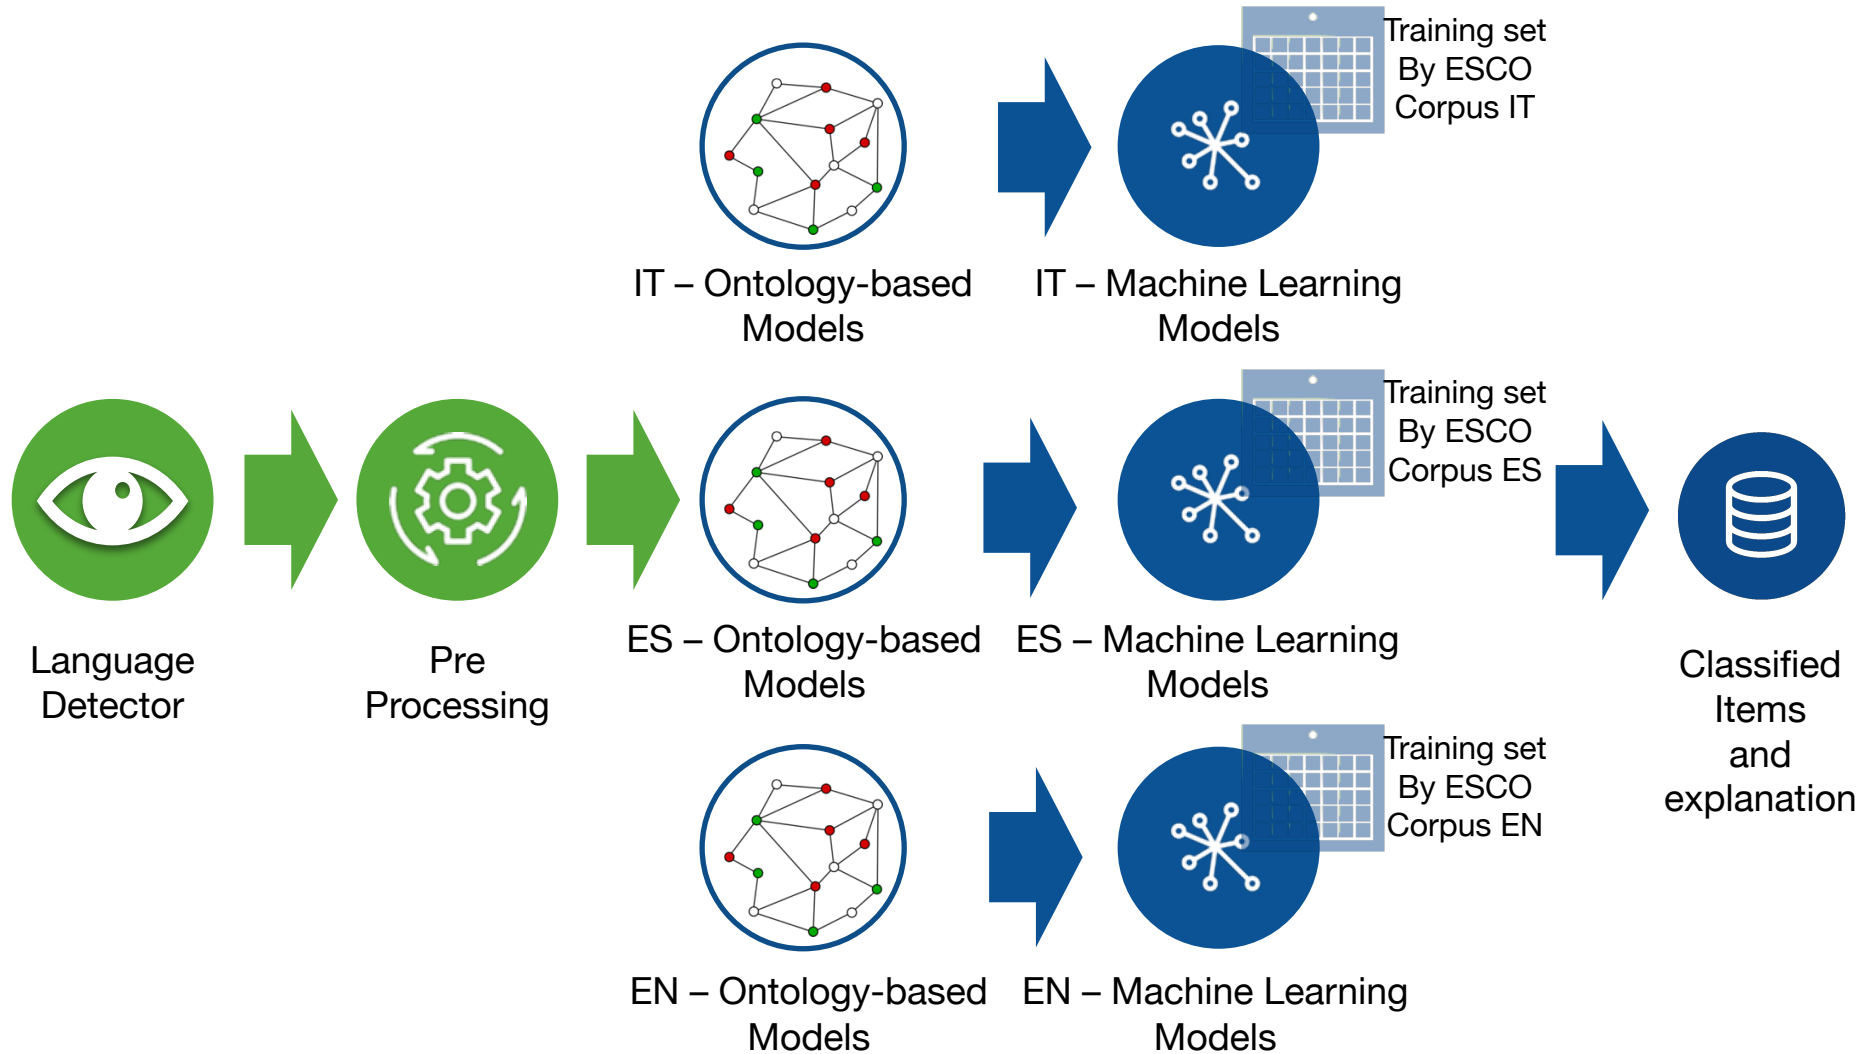

ES – Ontology-based
Models

EN – Ontology-based
Models

Classification

Topics

1. Context
2. Text processing and multi-language environment
3. Classification processes, feature extraction and machine learning
- 4. Focus on occupation's categorization**
5. Focus on skill's categorization
6. Preliminary results

Goals

- **Classify occupation from title of job ads**
- Develop a generic approach valid for all 25 official languages of European Union (but also the co-official languages)
- Reduce the use of gold datasets with the scope to minimize the impact of human errors and ambiguities
- Design a system that is easily controllable and can be improved in case of misclassification: importance of explainable of outputs
- Create an occupations ontology
- **Requirements**
 - **High precision**
 - **High comprehensibility**

Data and training set

- Multilanguage
- ~430 possible targets (ESCO Occupation Level 4)
- **Large Gold Dataset** for training ML models
 - For each language
 - 430 classes x 300 job ads ~ **120.000 manually labelled job ads**
 - 300 most common classes x 300 job ads ~ **90.000 manually labelled job ads**

First test

- Supervised learning
 - One model for each language (IT, DE, EN)
- Data labelled by expert from each country
 - ~35k job ads
 - 436 possible targets
- Evaluating set ~5.000 job ads
 - Weighted Precision ~30%
 - ~250 detected professions

Data Powers AI and Machine Learning

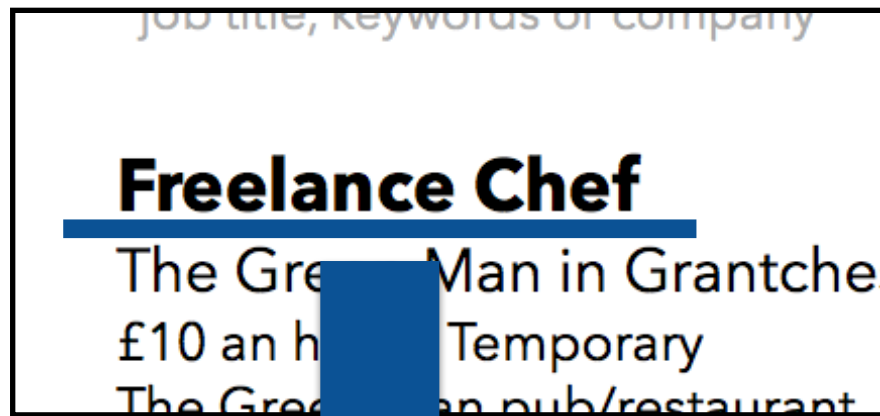

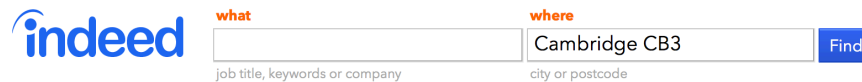

AI models can only learn from **diverse, high quality data**

More sophisticated models require even **more data** (high quality data!)

e.g. deep learning requires millions of documents!

ESCO v1

SAP Consultant

Posted 4 days ago by [Ascendant Recruitment](#)

📍 Milton Keynes, Buckinghamshire

🕒 Contract, full-time

💰 £50,000 - £60,000 per annum

👤 Be one of the first ten applicants

SAP Consultant

12 month contract

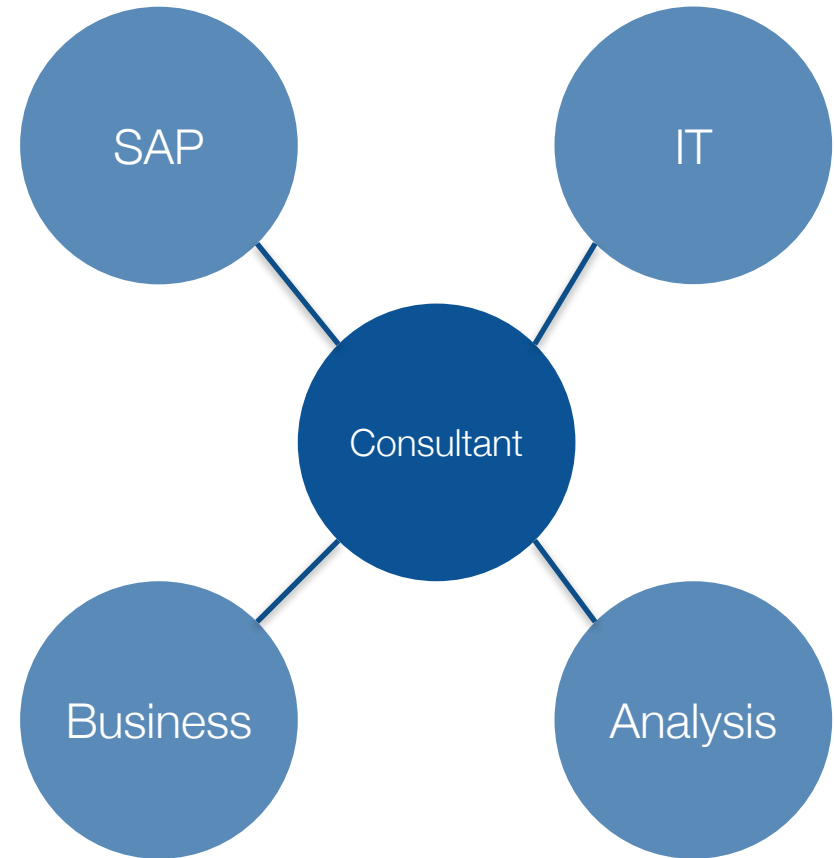

£50,000 - £60,000

Milton Keynes

We are delighted to be working with a prestigious client based in Milton Keynes for the recruitment of a qualified SAP consultant.

This is an exciting and challenging opportunity for an experienced SAP Consultant to join the e-business division of this large organisation.

The role will involve analysing business requirements as well as taking the lead in the design and delivery of solutions for various IT projects and business change programmes.

CEDEFOP

European Centre
for the Development
of Vocational Training

Final considerations

- Ontology based learning + Supervised learning
 - Esco Ontology
 - New labels from Topic modelling
- One model for each language (IT, DE, EN)
- Data labelled by expert from each country
 - ~25k job ads (cleaned train set using ESCO Ontology)
 - 436 possible targets
- Evaluating set ~5.000 job ads
 - Weighted Precision ~80%
 - ~423 detected professions

Topics

1. Context
2. Text processing and multi-language environment
3. Classification processes, feature extraction and machine learning
4. Focus on occupation's categorization
- 5. Focus on skill's categorization**

Fabasoft International Services GmbH

Application Developer (w / m)

Linz, Vienna Solid employment full-time Erschienen: vor 12 Tagen

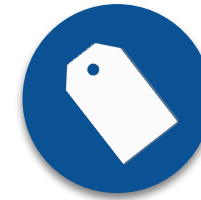

You are the right one, if

- you are interested in designing, implementing and integrating specialized applications and you like to work with high-end development tools and infrastructures
- you like using state-of-the-art web technologies to realize customized software solutions while being able to expertly use standard products / SDKs as well as libraries
- You have a solid computer science education (HTL, FH or University) and solid programming skills with Java and Eclipse
- Ideally, you have already gained experience with SOAP, WSDL and Web Services, as well as object-oriented modeling (UML) skills

We offer you

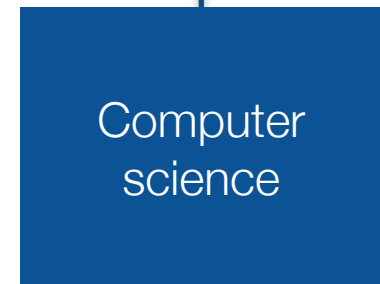

- working in a dedicated, highly motivated team in a professional environment
- Consistent training and further education as well as broadening horizons by attending international conferences
- interesting development opportunities for Certified Project Manager, Certified Scrum Master etc.
- numerous benefits, benefits and cool events as well
- above-average payment (at least EUR 35,000 gross annual salary, depending on your experience and qualifications also more) and a performance-based bonus system

Contact Person: Mag. Dipl.-Ing. Christian Distelberger
E-mail: job@fabasoft.com
Tel: +43 732 606162-0

Consistent
and linkage

<java> <eclipse>

Goals

- Extract skills from description of job ads (and other metadata fields, e.g. skills, drive licensing, languages, ...)
 - Develop a generic approach valid for all 25 official languages of European Union (but also the co-official languages)
- Identify noise
- Use alternative labels from common job ads languages (and industry de-facto standard)
- Record linkage between extracted skills and ESCO Ontology
- Design a system that is easily controllable and can be improved in case of misclassification: importance of explainable of outputs

Text Similarity Approaches

String
based

String similarity measures operate on string sequences and character composition.

Jaro-Winkler, Jaccard,
Cosine similarity

Corpus
based

Corpus-Based similarity is a semantic similarity measure that determines the similarity between words according to information gained from large corpora.

Latent Semantic Analysis,
Explicit Semantic Analysis,
DISTRIBUTIONALLY similar words
using CO-occurrences

Knowledge
based

Knowledge-Based Similarity is based on identifying the degree of similarity between words using information derived from semantic networks

Text Similarity Approaches

Example

You are the right one, if

- you are interested in designing, implementing and integrating specialized applications and you like to work with high-end development tools and infrastructures
- you like using state-of-the-art web technologies to realize customized software solutions while being able to expertly use standard products / SDKs as well as libraries
- You have a solid computer science education (HTL, FH or University) and solid programming skills with Java and Eclipse
- Ideally, you have already gained experience with SOAP, WSDL and Web Services, as well as object-oriented modeling (UML) skills
