## The ECVET mobility toolkit

### Support for integrating ECVET into new or existing Mobility Practice

[www.ecvet-toolkit.eu](http://www.ecvet-toolkit.eu)

The toolkit is an online platform to assist European Vocational Education and Training providers in the implementation of ECVET in their geographical mobility measures/projects.

The toolkit provides not only information about ECVET, but also practical and hands-on tools and examples for the introduction of ECVET principles to the different mobility phases:

Video interviews show experienced mobility practitioners from different countries, presenting their own experiences of using ECVET.

# A step-by-step process towards higher quality mobility

## 1. Reflecting on current mobility practice

- added value
  - good practice
  - ambition
- \* consider the importance of international mobility for your learners*  
*\* appreciate what works well in your current mobility practice*  
*\* envision how you might further develop*

## 2. Exploring the toolkit

A **user guide** helps you to navigate through the toolkit and a checklist confirms both key actions and key actors - as you work through the toolkit, it can also be useful to ask yourself:

- changes
  - goals
  - opportunities
- \* what's new?*  
*\* how could this help you in realising your ambitions?*  
*\* what (additional) opportunities do you see?*

## 3. Building partnership

- shared purpose
  - shared goals
  - shared views
  - common understanding
- \* confirm with new and existing partners a willingness to experiment with Learning Outcomes & ECVET*  
*\* decide which elements of ECVET you will implement together*  
*\* agree on elements that might require the participation of other actors*  
*\* outline the roles and responsibilities of all partners in a Memorandum of Understanding*

## 4. Implementing ECVET

- phased implementation
  - piloted implementation
  - guided implementation
- \* consider each of the mobility phases (**before-during-after**) and on the changes that ECVET might require*  
*\* undertake pilots with actual mobility participants*  
*\* use the checklists, templates and examples provided in the toolkit*

## 5. Evaluating with participants and partners

- successes
  - areas for improvement
  - need for (peer) learning
- \* confirm the benefits of having introduced ECVET, seeking input from partners and participants*  
*\* reflect on pilot implementation and consider how you might do things differently in the future*  
*\* invite yourself, your colleagues and your partners to participate in Communities of Practice*

**Need support?** Contact your National Agency for Erasmus+. Country details are provided in the toolkit.
