- ✓ Higher quality of VET systems
- ✓ International dimension
- ✓ Cross-border cooperation

Challenges ahead

- Sufficient funding
- Move towards system-based mobility
- Solve the problem of lacking recognition
- Ensure quality in mobility
- Introduce a mobility culture

How can mobility contribute to making VET more attractive?

- Mobility helps to create a positive and modern image of apprenticeship.
- Mobility supports learners to obtain the personal and professional knowledge skills and competence needed in an internationally oriented labor market.
- Key competences get more and more important in the world of work. Mobility, above all, contributes to strengthening personal and social competences.
- Do not forget the teachers! Raising the quality of teachers' trainings and improving the competences of teachers also contributes to improve the image of VET. Peer-learning is a very valuable mobility experience for VET professionals.
