The image contains a flowchart illustrating vocational education and training in Belgium (BE-FR) from secondary level to tertiary level, including adult learning. The chart is color-coded to differentiate between various types of programmes, such as general education, VET programmes, programmes combining VET and general education, and officially recognised vocational qualifications. It also indicates possible progression routes and end of compulsory education levels.

Key elements from the chart:
- **Secondary Level**:
  - Common lower ('1st grade') secondary education programmes
  - General prog. (transition education with general, technical and artistic streams)
  - Technical or artistic prog. (qualification education; school-based or dual)
  - Vocational prog. (qualification education; school-based or dual)

- **Tertiary Level**:
  - Master programmes
  - Dual master prog.
  - Bachelor programmes
  - Dual bachelor prog.
  - Professional bachelor prog.
  - Bachelor special.
  - Adult education prog. at primary, secondary and tertiary level

- **Adult Learning** (outside the education system)
  - Publicly subsidised training for unemployed and other vulnerable groups
  - Entrepreneurial & leading coordinating training
  - CVET for employees (sectoral training funds)

Possible progression routes are indicated by arrows, and the chart includes entry through validation of adults’ prior learning (formal/informal/non-formal) and work-based learning. Special education needs are also addressed, with some programmes being offered to adults up to age 25.

**NB**: ISCED-P 2011. Assignment of programmes to ISCED classification is under revision, so only the first digit in ISCED coding is displayed. EQF levels on qualifications are being discussed. Source: Cedefop and ReferNet Belgium, 2019.
