BELGIUM

European inventory on NQF 2020

Due to its federal structure, Belgium developed three NQFs, one for each of the three language communities: Flemish, French and the German-speaking. Despite adaptation to the needs of each community, the three frameworks share important common features, supporting interoperability. An amendment to Belgian federal law on the general structure of the education system was adopted in 2012, stating that the European qualifications framework will be used as a common reference for the three communities in Belgium; this addresses the challenge of linking the three frameworks and potentially eases mobility of Belgian citizens within the country. The three frameworks have been/will be referenced separately to the EQF: the Flemish and French Communities have completed this process and the German-speaking Community is expected to do so soon.

The country performs above average on several key education and training indicators: the rate of early leaving has continued falling (8.4% in 2019, compared to 10.2% in the EU), tertiary educational attainment and the employment rate of recent graduates are high, and education spending in Belgium is among the highest in the EU. However, socioeconomic and migration background have a strong impact on educational outcomes and gaps in knowledge, skills and competences. With low participation in adult learning, Belgium is less well prepared to tackle its high exposure to digitalisation and socially disadvantaged groups are not well represented in adult learning (European Commission, 2020). Thus, validation of skills remains high on the agenda with the decree on the integrated quality assurance policy and the recognition of prior learning (Vlaams Ministerie Onderwijs, 2019).

The share of upper secondary students in vocational education and training (VET) is (slowly) decreasing; all communities have taken action to improve dual learning; in the Brussels region, a one stop shop called the *Cité des métiers* (City of trades) provides access to all types of lifelong learning, including VET. The Flemish Community formally adopted a new apprenticeship pathway called 'dual learning' and, since September 2019, implemented school reforms; a new common curriculum, based on the EU key competences framework, was developed, focusing on fewer but more ambitious final attainment levels for first grade. The French Community is implementing school reforms from September 2020; central governance will be reinforced, combined with greater autonomy and accountability for schools and a common, multi-disciplinary curriculum will be developed first in pre-primary and then in higher grades (reaching 9th grade). The

Pact for excellence in education, a systemic school reform, will stretch to 2030 with the aim to improve basic skills and to reduce grade repetition and high dropout rates (European Commission, 2019).

Belgium (the French Community)

Introduction and context

The French Community of Belgium has developed a qualifications framework for lifelong learning (*Cadre francophone des certifications pour l'éducation et la formation tout au long de la vie*, CFC). Although initial work started in 2006, the current framework dates back to 2010, when the French Community (Federation Wallonia-Brussels), the Walloon Region (Wallonia) and the French Community Commission (COCOF) ⁽¹⁾ agreed on the principles of the framework and on a structure similar to that applied by the Flemish Community of Belgium.

The CFC was formally adopted in 2015, through a decree operationalising the agreement between the three francophone governments ⁽²⁾. It is an eight-level, learning-outcomes-based framework with double entry: one for educational qualifications and one for professional qualifications, placed into eight levels and consistent with the descriptors of the European qualifications framework. The proposed framework structure is close to that applied by the Flemish Community of Belgium. The CFC was referenced to the EQF in December 2013. Self-certification to the QF-EHEA is in progress. An updated referencing report is expected in 2022-23.

⁽²⁾ Ministère de la Communauté française (2015). Décret portant assentiment à l'accord de coopération conclu le 26 février 2015 entre la Communauté française, la Région wallonne et la Commission communautaire française relatif à la création et la gestion d'un Cadre francophone des certifications, en abrégé «CFC» [Decree of 15 May 2015 approving the cooperation agreement concluded on 26 February 2015 between the French Community, the Walloon region and the French Community Commission on the creation and management of the francophone qualifications framework, abbreviated as CFC]. *Moniteur belge*, No 145, p. 32947, 9.6.2015. <http://archive.pfwb.be/10000000201500e>

Policy objectives

The CFC seeks to improve transparency and comparability of qualifications across regional and national borders, to ease mobility and support learner progression, and to help bridge the different parts of the education and training system (Cedefop, 2020b).

While the framework does not have a regulatory role and is not an instrument for reform, the CFC aims to strengthen the quality of teaching and training, to support the validation of non-formal and informal learning, and to facilitate job seeking, recruitment and staff development processes. Through its focus on learning outcomes, it supports equal opportunities for citizens. The framework is also not seen as a control device for the validation of qualifications but rather a support instrument aiming at the continuous improvement of qualifications (Fédération Wallonie-Bruxelles; Wallonia and COCOF, 2018).

Levels, learning outcomes and qualifications

The CFC is based on learning outcomes, giving rise to arrangements for validation and credit transfer. An eight-level structure has been adopted, using two blocks of terms: knowledge/skills and context/autonomy/responsibility⁽³⁾. The descriptors developed by the Flemish qualifications framework have been used as a basis but adjusted according to the conditions of the community. In the first stage of implementation, only qualifications delivered by public providers are included.

A competence-based approach is established in compulsory education and training. Learning outcomes are described in terms of *socles de compétences* and *compétences terminales*. For adult education the term used is *capacités terminales*. A team has been appointed within the Ministry of Education to coordinate the 'cross-diagnostics of schools, training centres and validation of skills providers'⁽⁴⁾. Among the items under revision is the evaluation of learning outcomes, the material resources, the monitoring of quality in the assessment of learning outcomes and of the staff who carry out this process⁽⁵⁾ (Cedefop and Bruxelles Formation, 2019).

Regional providers of continuous vocational education and training (CVET) have developed a common certification procedure (*reconnaissance des acquis de*

⁽³⁾ More information [here](#).

⁽⁴⁾ A team of 'diagnosticians' from education, training or validation of skills evaluate jointly the assessment processes of VET providers. This is an external evaluation in accordance with the reference framework set by EQAVET (Cedefop; Bruxelles, 2019)

⁽⁵⁾ The report from the 'cross-diagnostics' team can be consulted (in French) [here](#).

formation, RECAF) based on common qualifications and assessment standards, with a competence-based approach, since 2010. The French service for trades and qualifications (*Service francophone des métiers et qualifications* (SFMQ)) plays an important role for learning outcomes, both for initial vocational education and training (IVET) and for CVET. The descriptions of qualifications are based on the occupational profiles (occupational standards) defined by the social partners. Common training profiles, described in units of learning outcomes, in line with the reality of trades to ensure the labour market relevance of training, are then defined by providers. This will support learner mobility by ensuring that prior learning is taken into account; it will also increase education and training system transparency and improve validation opportunities (Cedefop and Bruxelles Formation, 2019). Progress has also been made in the implementation of certification by units (*certification par unités d'apprentissage*, CPU) in formal IVET programmes. In this system, the Qualification Board is responsible for validating units of learning outcomes (*unités d'acquis d'apprentissage*, UAA). Each validation test of a unit is assimilated to a qualification test and the board issues a certificate. As of September 2017, CPU was put in place for three optional subjects in post-secondary education ⁽⁶⁾. The aim is to organise the three years of vocational education and training in the form of learning outcomes units. The experimentation and developments are carried out in the framework of the *Pact for excellence in education* or *Teaching excellence pact* which is a 2015 action plan to reform education that has paved the way for improving accessibility of all to VET and qualifications. The pact aims to improve education quality and reduce inequalities (between schools, students and genders) in the Wallonia-Brussels federation. In the context of a largely participatory approach and the collective ownership of the pact, this process is conducted in four phases. The implementation of the pact will be at phase 5 and will extend on a multi-year basis (2015-25) ⁽⁷⁾.

Although higher education institutions are autonomous in designing their curriculum, they are required to align their programmes in accordance with the *competences communes* developed by ARES (*Académie de recherche et d'enseignement supérieur*) ⁽⁸⁾. A guide has been produced to help higher

⁽⁶⁾ Graduates have direct access to tertiary education and can upgrade their VET qualification by following one-year technical follow-up programmes (called seventh year) at post-secondary level (Cedefop, 2020a).

⁽⁷⁾ More information can be found at [Eurydice Unit of the Fédération Wallonie-Bruxelles](#).

⁽⁸⁾ ARES is a public interest organisation funded by the French Community and created by the [decree of 7 November 2013](#), defining the landscape of higher education and the academic organisation of studies (Landscape Decree). The decree can be accessed [here](#). The reform brought by this decree is centred on three key words:

education institutions define their learning outcomes to fit into common competence reference systems. There is little information on the extent of use of learning outcomes in higher education in practice, apart from in the university colleges.

Institutional arrangements and stakeholder involvement

The CFC was formally adopted in 2015, through a decree operationalising the agreement between the three francophone governments ⁽⁹⁾. The three executive bodies of French-speaking Belgium (Federation Wallonia-Brussels, Wallonia and COCOF) ⁽¹⁰⁾ initiated the CFC development and consulted all CFC stakeholders (Fédération Wallonie-Bruxelles, Wallonie and COCOF, 2018).

The CFC Forum (*Instance CFC*) was established with the 2015 decree ⁽¹¹⁾ as a steering and allocation authority, responsible for managing the inclusion of qualifications in the framework and for disseminating the added value of the CFC and of the EQF to citizens, social partners, and education and training providers. It has four constitutive substructures ⁽¹²⁾, the Executive Committee ⁽¹³⁾, the

excellence (of research), consistency (of provision) and quality (of teaching), with a will to promote student success

⁽⁹⁾ Ministère de la Communauté française (2015). Décret portant assentiment à l'accord de coopération conclu le 26 février 2015 entre la Communauté française, la Région wallonne et la Commission communautaire française relatif à la création et la gestion d'un Cadre francophone des certifications, en abrégé «CFC» [Decree of 15 May 2015 approving the cooperation agreement concluded on 26 February 2015 between the French Community, the Walloon region and the French Community Commission on the creation and management of the francophone qualifications framework, abbreviated as CFC]. *Moniteur belge*, No 145, p. 32947, 9.6.2015. <http://archive.pfwb.be/10000000201500e>

⁽¹⁰⁾ The French Community or Federation Wallonia-Brussels (FWB), having competence for education; The Walloon Region or *Wallonia*, having competence for continuing vocational training for workers and jobseekers and for training for small and medium sized enterprises for the French-speaking part of the Region; The French Community Commission (COCOF) which has the same powers with regard to training as Wallonia for the French-speaking inhabitants of Brussels (Fédération Wallonie-Bruxelles; Wallonie; COCOF, 2013, p 12).

⁽¹¹⁾ Ministère de la Communauté française (2015).

⁽¹²⁾ For more information on the composition of the Management Board, the Committee of Experts and the Board of Appeal, please consult the Government Order of the French Community (February 2017) appointing these members. The order can be found [here](#).

⁽¹³⁾ The Executive Committee manages day-to-day requests for allocation of qualifications to levels, the evaluation of the CFC and the updating of the qualifications register.

Management Committee ⁽¹⁴⁾, the Committee of Experts ⁽¹⁵⁾, and the Board of Appeal ⁽¹⁶⁾. The secretariat supporting the implementation bodies of the CFC is hosted in the Francophone Agency for Education and Lifelong Training ⁽¹⁷⁾ but the budget is received from the three French-speaking Governments (the French Community, the Walloon Region and the French Community Commission).

The division of the framework into two main strands – educational and professional qualifications – had implications for stakeholder involvement. The Ministry of the French Community regulates formal education and is responsible for defining and positioning educational qualifications at levels 1 to 4 in the framework. The *Service francophone des métiers et qualifications* (SFMQ) ⁽¹⁸⁾ plays a key role in defining and positioning professional qualifications at levels 1 to 4. The SFMQ is well placed to play this role as its overall task is to develop occupational profiles based on the inputs from the social partners and in collaboration with employment services. Its role is also to develop training profiles for these occupational profiles, in liaison with education and training providers. The Academy of Research and Higher Education (ARES) is responsible for defining and positioning educational higher education qualifications at levels 6 to 8: this is still in process. ARES and SFMQ share responsibility for qualifications at level 5, reflecting the extensive ‘mix’ of professional and educational qualifications at this level.

The quality assurance system in French-speaking Belgium involves an external and formative assessment approach for higher education programmes, implemented by the Agency for Quality Assessment in Higher Education

⁽¹⁴⁾ The Management Committee assigns a level to the qualifications submitted by education and training operators. The organisation of the Management Committee is governed by internal regulations.

⁽¹⁵⁾ The Committee of Experts provides its opinion on current and future decisions by the Management Committee, along with useful information on the functioning of the system and evaluation of its implementation.

⁽¹⁶⁾ The Board of Appeal deals with appeals on the allocation of levels to qualifications.

⁽¹⁷⁾ [Agence francophone pour l'éducation et la formation tout au long de la vie.](#) (Francophone agency for education and life-long training).

⁽¹⁸⁾ The SFMQ gathers public employment services, social partners, all VET providers from the French-speaking Community and the Skills Validation Consortium. The agency is responsible for creating profession profiles reflecting the reality of the job, creating training profiles based on profession needs, and thus assuring the consistency between the training offered and job-market needs. It establishes the link between profiles and structures of public employment services and improves the legibility of qualifying education systems, trainings, skills validation and job offers; it sets common references and language for all partners (Cedefop and Bruxelles Formation, 2019).

(AEQES) ⁽¹⁹⁾. In addition, a legal assessment and inspection procedure is implemented by the General Inspectorate for basic, secondary, special and social promotion education in particular. This approach is also used by the IFAPME/SFPME through the Training Directorate whose role is to inspect training centres.

Recognising and validating non-formal and informal learning and learning pathways ⁽²⁰⁾

In French-speaking Belgium, the system for validating non-formal and informal learning has undergone important developments and is the result of initiatives supported nationally and framed by important pieces of legislation. Policy strategies ⁽²¹⁾ confirm that validating non-formal and informal learning is a key element of employment and education policies. There are two types of VNFIL in Belgium: the validation of competences (*validation des compétences*, VDC) in the CVET sector, leading to the award of a recognised skills certificate (*titre de compétence*) following an assessment procedure; and the ‘valorisation’ of prior experience (*valorisation des acquis de l’expérience*, VAE) in adult education and higher education, leading to the validation of learning units or exemptions from certain parts of a study pathway ⁽²²⁾.

⁽¹⁹⁾ The AEQES is an independent public service and a full member of the European ENQA network and is included on the European quality assurance register for higher education (EQAR).

⁽²⁰⁾ This section draws mainly on input from Popovic, M. (2019). *European inventory on validation of non-formal and informal learning 2018 update: Belgium – French speaking community*.
https://cumulus.cedefop.europa.eu/files/vetelib/2019/european_inventory_validation_2018_Belgium_French.pdf

⁽²¹⁾ [Plan Marshall 4.0 \(2015\)](#); [Strategy for the Walloon Region 2014-19](#) (Déclaration de politique régionale 2014-19); [Strategy 2025 for Brussels](#).

⁽²²⁾ It is important to make the distinction between the concepts of ‘valorisation’ – to enhance and get credit for prior experience with a view to obtaining access to formal education and training – and ‘validation’, which gives access to a recognised title or qualification. Although the standards used for validation for the latter are the same as in the formal system, skills certificates awarded through validation are not equivalent to formal VET qualifications. They can be used to access further training courses and can be combined to obtain a qualification in the adult education sector which may be included in the NQF.

The most significant developments have been in adult education, where the decree ⁽²³⁾ published in January 2018, promoted a unified approach to admission, exemption and certification of formal, non-formal and informal prior learning. It also sought coordination between EPS providers, further development of validation procedures, transparency, clear routes and further transferability of certificates, as well as close cooperation with the CVET sector. In higher education, with a regulatory framework in place since 2014 (Decree on the organisation of higher education), VAE has a stronger institutional basis and is used to grant admission to education pathways (all cycles of higher education) or exemptions. At secondary level (vocational or non-vocational), VAE is used to grant admission into education pathways or exemptions, but it can also lead to a certificate of achievement (*attestation de réussite*) when the student passes the integrated final test (*épreuve intégrée*). The Validation Skills Consortium grants skills credentials on behalf of the three governments. They can be used on the job market and are recognised by public services for employment and adult education schools. It allows navigation between all the vocational training providers as long as they are members of the consortium (Cedefop and Bruxelles Formation, 2019).

Recognition and validation of non-formal and informal learning is also embedded in the NQF decree, which makes facilitation of VNFIL part of the NQF's objectives. It defines 'certification' as the formal result of an evaluation and validation carried out by a competent authority, establishing that an individual possesses the learning outcomes corresponding to determined standards, either at the end of an education or training pathway or following validation of his/her competences.

Challenges need to be addressed, particularly in terms of widening the profile of VAE users and reaching out to disadvantaged communities such as migrants and refugees. While awareness of the value of validation procedures for the labour market has been increasing, additional investment and strategies in visibility efforts are to be put in place. However, the scheme today is generally considered effective and robust.

NQF implementation and impact

The CFC reflects the federal structure of the country and coexists with the qualifications frameworks of the Flemish and German-speaking Communities. The

⁽²³⁾ Gouvernement de la Communauté française (2018). Arrêté du gouvernement de la Communauté française fixant les modalités de valorisation des acquis pour l'admission, la dispense et la sanction dans une ou des unités d'enseignement de promotion sociale. *Moniteur belge*, No 13, pp. 3407-3416, 18.1.2018.

CFC is seen as an integral part of an evolving education and training system and is at an activation stage. Introducing the distinction between educational and professional qualifications was instrumental in bringing the NQF process forward. This distinction made it possible to open-up the framework for professional qualifications at higher levels. In principle, both types can be placed at any level in the framework. Allocation of qualifications to CFC levels started in 2017 and continues.

A qualification register ⁽²⁴⁾ has been developed and 174 qualifications have been included in the register to date (January 2021), at levels 2 to 7. These are vocational and secondary general education qualifications, qualifications awarded through validation and higher education qualifications (see above). The register is linked to the Europass portal ⁽²⁵⁾. It is possible to position qualifications for a period of two years under a transitional procedure, after which a new application will have to be submitted for final allocation of level. The need for this progressive approach comes from the differences between the systems of the competent authorities, which imply agreements for criteria shared by all providers.

CFC/EQF levels are indicated in the register and on Europass certificate and diploma supplements ⁽²⁶⁾. One of the main objectives of the CFC Forum is to indicate the NQF/EQF level on all qualifications in the future.

The main challenges in implementing the CFC have been to include more qualifications in the framework to enhance comparability and disseminate the benefits of the framework to citizens and beneficiary institutions (European Commission and Cedefop, 2020). However, the competent authorities have no obligation to file an application for positioning qualifications. Another reason for the lack of inclusion of more qualifications is that such qualifications might not fully meet the prerequisites for inclusion. To address this issue, the EQF NCP has held three meetings presenting recommendations on the systems of the competent authorities and procedures of external quality agencies or mechanisms (Fédération Wallonie-Bruxelles; Wallonie; COCOF, 2018).

The EQF NCP is planning to disseminate information about the framework using its website, video clips, brochures and guidance documents. The target group that will be prioritised will be the general public, as the framework is currently less known among labour market actors at regional and local level. Employers, guidance counsellors of education and training providers, employment counsellors of public employment services, teachers, trainers, trade union representatives and

⁽²⁴⁾ *Registre des certifications*: <http://www.cfc.cfwb.be/cfc/certifications/>

⁽²⁵⁾ The register is linked to the [Europass portal](#).

⁽²⁶⁾ See [Europass certificate and diploma supplements](#) and [Certificate_Supplement_Europass_EN \(cfwb.be\)](#)

human resources managers will also be informed, as they will be able to disseminate the benefits of the framework to the end-users. To date there has been no evaluation study on the different aspects of the framework and its impact (European Commission and Cedefop, 2020).

Referencing to the EQF

The CFC levels were referenced to the EQF levels in 2013 (Fédération Wallonie-Bruxelles, Wallonie and COCOF, 2013). Self-certification to the QF-EHEA is in progress. An updated referencing report is foreseen for 2021.

Important lessons and future plans

Important steps have been taken so far in developing the framework: the framework is firmly legally embedded, implementation bodies have been set up, criteria and procedures for inclusion of qualifications have been adopted and around 180 qualifications have been included in the qualifications register.

The development of the CFC also demonstrates the importance of finding a workable link between higher education and the other forms of education and training. Distinguishing between educational and professional qualifications at all levels has been instrumental in making progress. Whether this structure can be used to open up for future developments of professional qualifications at higher levels and for establishing stronger links between educational and professional sectors remains to be seen.

However, for the framework to act as a credible reference point and improve transparency and comparability of qualifications, a higher percentage of qualifications from all types of providers needs to be included and levelled. In this way, the CFC can guarantee their comparability in the French-speaking part of Belgium. Strengthening the communication plan regarding the CFC is needed as the framework is currently less known or used by the general public.
