

Strengthening foundations for a competitive Europe

The skills nexus between productivity and job quality

29-30 June 2026

“Competitiveness depends on people. It is the professional skills of people that are crucial for Europe to adapt to new transitions and to develop new innovations into globally competitive companies. In EU we have many strengths but it’s clear that we also have many challenges in this area. We need to close the skills gap, and we need to empower each and everyone to develop their skills for quality jobs.” (Ylva Johansson, chair of the European Skills High-Level Board)
