**Question No 1**

*In some ways Norway (and Iceland) is included in the work of Cedefop. In this study where you have called for tender, it looks like that Norway is not included. Is that correct understood? If that is the case, is there any possibility to include Norway?*

**Cedefop's answer to question No 1**

Please note that Cedefop may decide after contract signature, during the implementation stage and in agreement with the contractor, to include additional countries beyond EU Member States. But for the preparation of the tender, all tenderers must strictly make their proposals taking into account the countries that are mentioned in the tender documents only.
