Updating information in the VET in Europe database

Deliverable 2a

Background

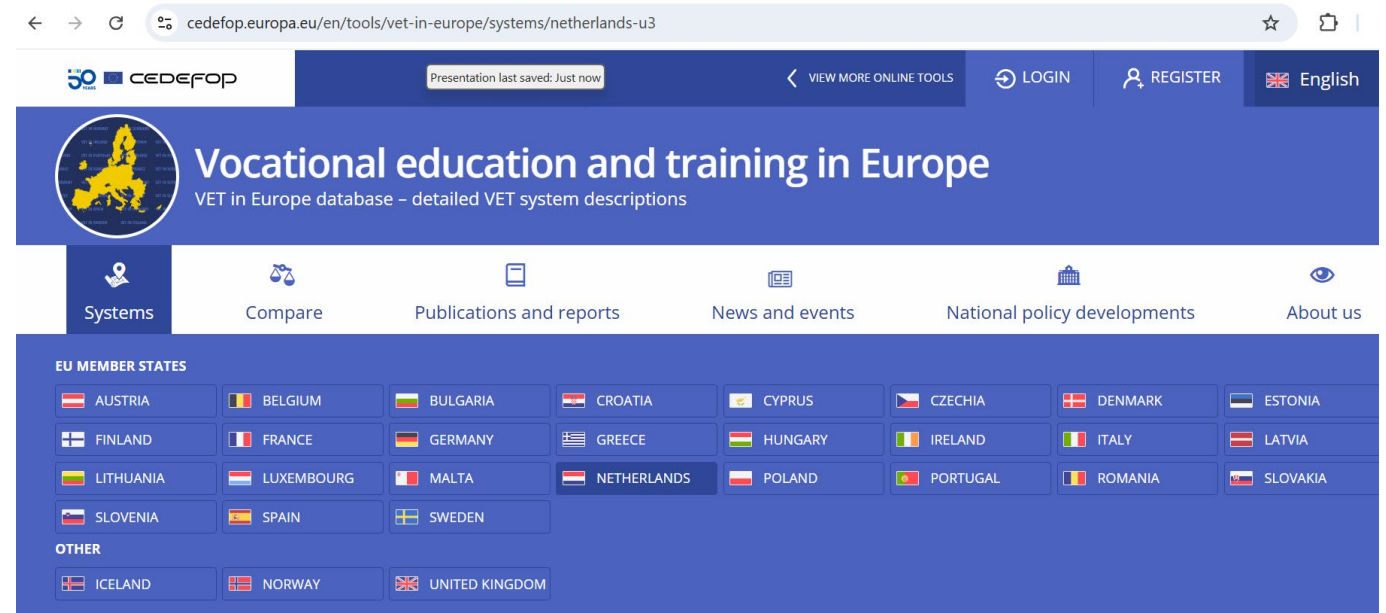

The VET in Europe database is an online tool presenting all EU VET systems, organised by theme, with VET system charts and detailed information on programme types. It allows users to compare VET systems and download system descriptions – either full or short (spotlights).

Method

- Cedefop will provide ReferNet partners with the 2023 data (identical to the online data). ReferNet partners will be asked to follow instructions and update the information about their VET system(s) with the cut-off date January 2026.
- After receiving the data (updated text and system charts), Cedefop may contact ReferNet partners to clarify the information provided.
- After the data and charts are finalised, they will be transferred to the database by Cedefop. ReferNet partners will be asked to make the final check of the online data for any inconsistencies or errors.

Steps

- Cedefop will provide guidelines **by end-November 2025.**
- ReferNet will submit the updated data to Cedefop **by end-February 2026.**
