

Definition and writing of learning outcomes - Slovakia

Selected qualification: Local guide

State Vocational Education Institute, Slovakia

National Qualifications System in Slovakia

- National project "Development of the National Qualifications System",
- Two main goals:
- a) development of National Qualifications Register in Slovakia,
- b) revision of the national descriptors (Slovak Qualifications Framework),
- The project itself has five main activities (analyses, methodologies, development of databases of qualifications, information system, education activities)
- Duration of the project: March 2013 November 2015,
- First phase of implementation the main goal is to identify and describe the qualifications (1000).

Methodological information

- Coordinated process of multiple structures within the project,
- First step: analysis of the (formal) study/training branches and accredited courses by project's WGs,
- Second step: involvement of sector councils, development of "Qualification Cards",
- Third step: levelling the qualifications by project's WG,
- Fourth step: experts' credential,
- Fifth step: final approval from the National Council for Education and Qualifications.

Sector councils

- Main authors (guarantors) of the qualification cards,
- 24 Sector councils,
- Experts from the industry, social partners and the educators,
- Assigned branch groups which create the basis for the Qualification Card,
- Sectorial council coordinates the process and approves of the qualification cards,
- Their work consists of work meetings and upload the cards into a application system designed for the project.

Qualification Card

- Consists of five sections:
- 1. Qualification's "birth certificate" (not available to the public),
- 2. Statistical information (not available to the public),
- 3. Qualification standard,
- 4. Assessment standard,
- 5. Methodological/material/staff/space instructions for exam realisation,
- Its author(s) access them trough the system,
- They are available for the public online, on the www.kvalifikacie.sk website.

Qualification's birth certificate

• Source of the qualification, it's annotation, arguments,...

Ctatistiská informásia

Statistical information

• information about the qualification concerning its relationship to occupation(s) (SK ISCO-08) and study branch (numerical code of study/training branch) where available, list of certificates, learning

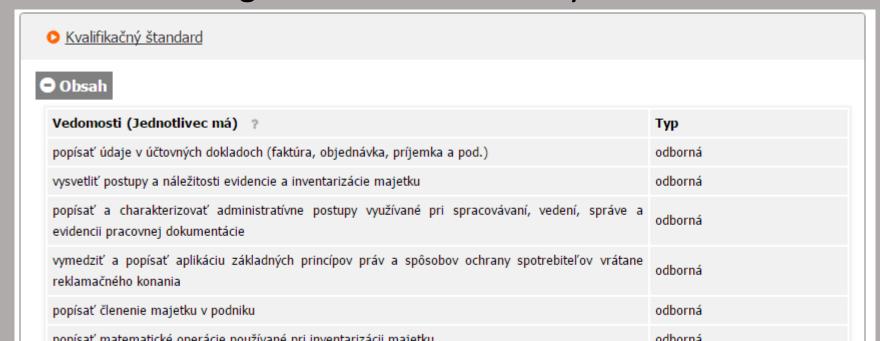

path etc.

Statisticke informacie	
○ Obsah	
Kód kvalifikácie	C4311002-01074
Názov kvalifikácie	Administratívny pracovník správy a evidencie majetku
Typ kvalifikácie	čiastočná
Súvisiace kvalifikácie ?	Supervízor administratívnych pracovníkov <u>Špecialista v oblasti hospodárskej správy a údržby majetku</u> <u>Manažér hospodárskej správy a údržby majetku</u> <u>Manažér obstarávania</u>
Názov povolania	Administratívny pracovník správy a evidencie majetku
Príbuzné povolania	Administratívny pracovník v účtovníctve
SK NACE Rev.2	N ADMINISTRATÍVNE A PODPORNÉ SLUŽBY, 82 Administratívne, pomocné kancelárske a iné obchodné pomocné činnosti

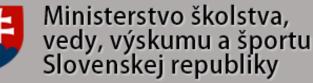

Qualification standard

- Categories: knowledge (general, vocational), skills (cognitive, practical), competences (autonomy, responsibility, social competences),
- Broader scope
- Formulated according to Bloom's taxonomy.

Assessment standard

- Learning outcomes are classified into logical groups (units)
- Detailed, connected to broader LOs in qualification standard
- Create basis for standardised exam: indicates methods and instruments of assessment (e. g. written test, simulated task, project etc.) and minimum requirements for successful completion of the exam.

O Hodnotiaci štandard

Oblast' hodnotenia

popísať členenie majetku v podniku

rozčleniť majetok z hľadiska spôsobov jeho správy a evidencie

zaevidovať tovar do evidencie majetku

vysvetliť postupy a náležitosti evidencie a inventarizácie majetku

	Kritériá hodnotenia	Metódy hodnotenia	Nástroje hodnotenia		
1	vymenovať náležitosti evidenčných listov majetku	ústna metóda	ústna odpoveď		
2	vymenovať náležitosti skladových kariet	ústna metóda	ústna odpoveď		
3	správne zaevidovať prijatý tovar	praktické skúšanie	praktické predvedenie		
4	rozčleniť majetok z hľadiska jeho evidencie	písomná metóda	písomná úloha		
5	popísať postup pri inventarizácii a určiť zákon ktorý vymedzuje jej priebeh	ústna metóda	ústna odpoveď		

Podmienky úspešného vykonania skúšky

Podmienkou úspešného vykonania skúšky je splniť uedené kritériá hodnotenia na 80%.

Methodological/material/staff/space instructions for exam realisation

• Identifies the requirement for exam execution based on the legislation, demands on material, machinery, tools etc. — i. e. the standards which the authorised institution/person must fulfil to be able to realise the exam.

Požiadavky na odbornú spôsobilosť skúšajúceho

Členmi skúšobnej komisie sú fyzické osoby, ktorých odborná spôsobilosť sa rovná úrovni lektora.

Zákon 568/2009 Z.z. o celoživotnom vzdelávaní a o zmene a doplnení niektorých zákonov v znení neskorších predpisov, § 17 a § 18

- a) vysokoškolské vzdelanie prvého alebo druhého stupňa v príslušnom odbore vzdelávacieho programu, najmenej dva roky praxe v odbore, ktorého sa vzdelávací projekt týka, a najmenej dva roky lektorskej činnosti,
- b) vysokoškolské vzdelanie prvého alebo druhého stupňa v inom odbore, najmenej štyri roky praxe v odbore, ktorého sa vzdelávací projekt týka, a najmenej dva roky lektorskej činnosti,
- c) úplné stredné vzdelanie s maturitou v príslušnom odbore vzdelávacieho programu, najmenej štyri roky praxe v odbore, ktorého sa vzdelávací projekt týka, a najmenej tri roky lektorskej činnosti,
- d) úplné stredné vzdelanie s maturitou v inom odbore, najmenej päť rokov praxe v odbore, ktorého sa vzdelávací projekt týka, a najmenej

Local guide – general information

Basic question: is this qualification required?

1st step: labour market analysis – occupation 2nd step – analysis of learning pathway

QUALIFICATION CARD

Non-formal learning		
Learning completion	final exam	
Evidence on qualification	certificate	

<u>Local guide – LOs development</u>

Methodology for development of qualification standard

QS must "answer the question what an individual must know (cognitive area), understand (cognitive and affective area) and do (affective and psycho-motoric area) to accomplish task and prove his or her performance".

- a) Cognitive area: theory, principles, rules, content etc.
- b) Psychomotoric area: manual performance, operations and similar activities, use of methods, materials, tools, machinery etc.
- c) Affective area: attitudes, social (interpersonal, intrapersonal) abilities and intraction, communication, responsibility and autonomy etc.

Local guide – LOs development

- Basic rules:
- 1. active verb, infinitive (binding)
- 2. 1 statement 1 verb (recommended)
- measurable performance (binding)
- 4. observable performance (binding)
- 5. statement describes performance or product, not a process (to achieving the performance or product) (binding)
- 6. exactness (to avoid ambiguity) (binding)
- 7. Number of used LOs (recommended):

	Vedo	mosti		Zručnosti			Kompetencie						
Všeobecné Odborné		Kogni	tívne	Praktické		Zodpovednosť		Samostatnosť		Sociálne kompetencie			
	Odporúčaný počet stanovených VV												
Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
4	12	6	18	3	7	7	23	4	12	4	12	2	6

QS – examples of LOs

describe the sights of cultural heritage of the relevant region (historical and cultural sights of	vocational
secular and sacred architecture, archaeological findings and sites, historical parks and gardens,	
historical cemeteries, sights of folk architecture, technical and industrial sights)	
describe important sights of architecture of the 20 th and 21sr century of the relevant region	vocational
describe important sights of graphic art of the relevant region	vocational
characterise the location and physical/geographical situation of the relevant region (topography,	vocational
climate, waters, biota and protected natural areas) and their importance for tourism	
characterise the demographic situation of the relevant region (population, habitation, economy,	vocational
transportation and services) and their importance for tourism	
characterise administrative structure of the relevant region as a part of legal and political system	vocational
of the Slovak republic	
name important historical and modern personalities of the relevant region, local countrymen	vocational
describe the customs, traditions, folklore, myths and legends of the relevant region	vocational
characterise the present-day cultural and social life of the relevant region/location, cultural	vocational
establishments (galleries, museums, theatres, concert halls etc.), educational and cultural	
institutions, regular cultural and social events	
characterise the tourism as the sector of industry, its institutional administration, forms and	vocational
types of tourism, products and service providers in the relevant region	

Local guide – Assessment standard

Methodology for development of assessment standard

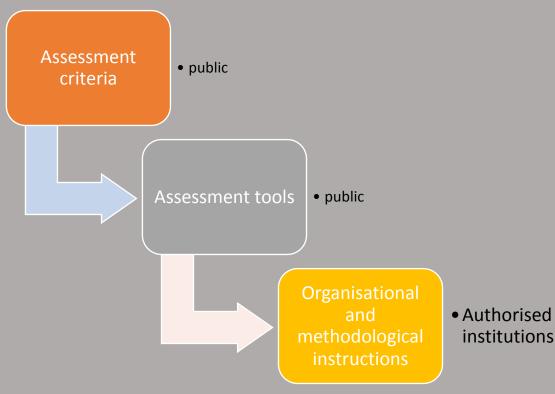

AS must "take into consideration whether the qualification is prevalently... academically... practically oriented... or oriented towards

soft skills (competences)".

Rules:

- a) Generally valid
- b) Objectivity

LOs grouped logically into units

Local guide – LOs segmentation I

Qualification standard

describe history of art and architecture, development of style periods, their characteristic features

Assessment standard

assign examples of specific monuments of secular and sacral architecture to particular architectural styles - Gothic, Renaissance, Baroque, Rococo, Classicism, Art Nouveau, new waves

describe monuments of religious architecture, the history of their construction, interior equipment, church services, guided tours for the public

describe the history of art and develop architectural styles from Romanesque to funkcionaloism

Introduce the most significant monuments of architecture of the 20th and 21st century in the region

exam is mostly based on practical performance — simulated guided tour

Local guide – LOs segmentation II

Qualification standard

use maps during the presentation

Assessment standard

demonstrate the ability to read topographic maps, characterize the scale of maps and legends

identify the cardinals on the ground and on the map without technical aids
