

Future of VET The Way Forward

Cedefop

Vivian Lai Dini
Education Specialist, Hong Kong
(Former Hong Kong Council for Accreditation of Academic and Vocational Qualifications)

The main challenges for global VET research in the next decade

- digitalisation of VET (teaching & learning, competence needs)
- work-based learning (WBL)(role of stakeholders, industry engagement, policies)
- internationalisation of VET (integration, international standards, recognition)

Main steps to be taken to strengthen research that reflects the critical role of VET in society and labour market

- study on how micro-credentials interact and integrate with existing frameworks and qualifications
- develop flexible progression pathways for VET

Thank you!
