

# Leaving education early: putting vocational education and training centre stage

*Volume II: evaluating policy impact*

## Description

Published in two volumes, [the first](#) is dedicated to understanding better the learning pathways of young students, providing measurements of early leaving in VET, and understanding the role of VET in breaking the vicious cycle of early leaving and unemployment. This second volume reviews VET-related measures to tackle ELET, either by preventing learners dropping out and/or by bringing those who have already left back to education and training. This volume identifies and discusses the key features of successful policies and practices, plus the conditions necessary to evaluate and upscale successful regional and local practices to national strategies.

## Countries

Europe

## Beneficiaries

Early leavers from education and training  
VET students (in work based learning schemes)

Secondary education students

Unemployed youth

Young people

Unemployed adults

VET students (school based)

Vulnerable groups

Migrants / refugees
